### **DETAILED ACTION**

The previous office action omitted claim 15. This office action is sent in its place to correct that omission.

### ***Claims***

Claims 1-13 are cancelled.

Claims 14-16 are pending.

Claims 14 and 16 were addressed in Office Action dated 04 January 2007.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 15 is rejected under 35 U.S.C. 102(e) as being anticipated by Gitlin et al, United Patent 5,880,620.

3. In re claim 15, Gitlin et al '620 discloses a circuit comprising at least one SOI device (Col 14, lines 10- 15), a method for enhancing the performance of the circuit, the method comprising the steps of: providing a pulse discharge circuit (Gitlin et al '620, "body bias control circuit") connected to the at least one SOI device (Col 14, lines 10-

Art Unit: 2815

15), said pulse discharge circuit (Gitlin et al '620, "body bias control circuit") comprising an input signal (Fig 12, item 1201), a delay element (Fig 12, item 1210) coupled to the input signal (Fig 12, item 1201) and an output signal (Fig 12, item 1202) coupled (Fig 12, item 1201) to the input signal (Fig 12, item 1201), the output signal (Fig 12, item 1202) driving the circuit (col 1, lines 5-8); and using the pulse discharge circuit to discharge any accumulated potential on a body (Col 14, lines 10-15) of the at least one SOI device (Col 14, lines 10- 15) prior to accessing the at least one SOI device (Col 14, lines 10- 15).

### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

***Response to Arguments***

5. Applicant argues that examiner's rejection of claim 15 in the Final Office Action dated 04 January 2007 appears to be inconsistent with examiner's indication of allowable subject matter in claim 8 and therefore claim 15 should also be allowed.

Claim 15 is fully addressed in this office action as being anticipated by Gitlin et al, United Patent 5,880,620.

Applicant's arguments are not persuasive, as they were based on the absence of claim 15 in the rejection. As that absence was an inadvertent omission, that argument is not persuasive.
